slow repetitive boring cool artwork, but. yeah i wouldnt recommend it its basically like BROOKHAVEN EXPERIMENT for 3 year olds colored squares float towards you from all sides, choose the matching color to paint them so they explode thats it.. I initially got this game because I was impressed by the sleek visuals from the trailer. The gameplay is sort of like tilt brush meets action game where you time enemy attacks and paint to block and counter them. Overall a lot of potential, but have to see if the developers can excute all the planned features.
